LinkedIn

I'm a student from Serbia and I love to code. My aspirations to become a web developer began in primary school. My professor showed me how I could write HTML in a notepad. It looked simple, write some stuff on any machine and see things change immediately. I knew I needed to learn it. This is where I am now.

PROJECTS

Savers Bank
Sass Project
Mar 2022 — Apr 2022

- Using sass mixins and variables instead of CSS properties;
- All CSS was written in **SASS**- an CSS preprocessor;
- Fully responsive design;
- Made with **HTML, CSS and Sass, JavaScript**.

Space Travel
JavaScript Project
Feb 2022 — Mar 2022

- Project styled with CSS add-on **Open-props**;
- HTML was imported from .json file using JS;
- Changing pages/tabs was done with JS;
- Made with **HTML, CSS and Sass, JavaScript**.

Fridge Sport
Tailwind Project
Jan 2022 — Feb 2022

- First time using external CSS library;
- All CSS was written using **Tailwind** - class based CSS framework;
- Fully responsive design;
- Made with **HTML, CSS and Tailwind, JavaScript**.

Titan MOBA
Responsive CSS Project
Dec 2021 — Jan 2022

- First website based on my own design;
- All styling was done with **vanilla CSS**;
- Responsive navigation;
- Made with **HTML, CSS and JavaScript**.

Burger Town
First Project
Dec 2021 — Jan 2022

- First Website that I ever made;
- Responsive design;
- Made with **HTML, CSS and JavaScript**.
